

MUGGLES MITTENS

BRITISH SHORTHAIR CATTERY

Welcome Home

Everything your new kitten needs for a happy start

A little one is coming home

Thank you for choosing a Muggles Mittens kitten. Your kitten has been raised underfoot in our family home, raw fed from day one, and thoroughly socialised with the everyday sounds of a busy household. This guide will help you give them a calm, confident start.

BEFORE COLLECTION DAY — YOUR SHOPPING LIST

- A litter tray (and cat litter) — placed somewhere quiet and easy to reach.
- Food and water bowls, kept apart from the litter tray.
- A sturdy scratching post and a few simple toys.
- A cosy bed, and a carrier for the journey home.
- A supply of their raw food (we send you home with some to begin).

THE FIRST 48 HOURS

Settle your kitten in one quiet room to begin with, rather than the whole house at once. Keep their routine and food exactly as it has been. Let them explore in their own time — sit on the floor, speak softly, and let curiosity do the rest. A little hiding at first is completely normal.

RAW FEEDING — CARRYING ON AT HOME

Your kitten is thriving on a complete raw diet. We recommend continuing it: keep food refrigerated, serve at room temperature, wash bowls after each meal, and offer small, frequent portions suited to their age. If you would prefer to change their food, do so gradually over a week or two, mixing a little more of the new food in each day. There is fuller guidance on our website under Kitten Guides.

Settling in & staying well

YOUR FIRST WEEK

- Register your kitten with your own vet for a first check-up.
- Activate the four weeks of free insurance included in your pack.
- Introduce children and other pets slowly and calmly, always supervised.
- Keep to the same food and litter to avoid tummy upsets while they settle.

WHAT COMES IN YOUR KITTEN PACK

- GCCF registration papers and pedigree.
- Vaccination record and microchip documents.
- Four weeks of free GCCF insurance.
- A blanket that smells of mum, and their favourite toys.
- A starter supply of their current raw food.

SIGNS OF A HAPPY, SETTLED KITTEN

Eating well, using the litter tray, playing, and seeking out your company are all good signs. If your kitten stops eating for more than a day, seems lethargic, or has ongoing upset digestion, contact your vet — and do tell us too. We remain on hand for the whole of your cat's life.

OUR PROMISE TO YOU

Every Muggles Mittens kitten leaves with a health guarantee and a breeder who never disappears. If your circumstances ever change, at any age, your cat has a home to come back to. You are not just taking home a kitten — you are joining a family we stay close to for life.
